Instructions on how to print:

For printing, choose the following types:
- Direct digital printing (direct printing lies on products made of 100% cotton),
- Thermal transfer (but it is not durable),
- Silkscreen (suitable for industrial T-shirt printing).

Each printing house has its own requirements, you can always text us
if the printing house asked for a different format or there are problems.

h=33-44 mm (clothing size: XS-XL)

We recommend to make the brand element "PAY" by embroidery or thermal applique.
The size of the applique depends on the size of the T-shirt.

Try to choose company fabric colors, they are mentioned at the beginning of the presentation.
